Irish Vendéen Sheep Society – Premier Show and Sale

On Wednesday, 15th July 2015 in Roscommon Livestock Mart, the Irish Vendéen Sheep Society welcome you to their 19th Annual Premier Show and Sale. Most of the animals on offer have been recorded by Sheep Ireland using the lamb plus recording scheme. The sheep recorded in 2015 are ranked on a star basis for terminal and replacement traits. The indices published in this catalogue are the evaluation run on 29th June, 2015 by Sheep Ireland. The Vendéen breed is mainly a terminal sire breed, so most emphasis should be put on this trait. There are 41 males and 12 females in this year's sale. Lambs all have the pedigree code in the format XYZ150AA; while shearling have the pedigree code in the format XYZ140AA. Animals in this catalogue that have been recorded have their star rating included. Lambs born in 2015 with a **5 star terminal trait** rating are in a LambPlus show class (class 2a for ram lambs and 4a for ewe lambs), and will compete for the "Lamb Performance Cup", donated by Pat Oliver.

Vendéen Sheep originated from the West Coast of France where they experience hot/dry summers and cold/wet winters, which leave them adaptable to all types of farming systems – be it intensive or extensive. Since their introduction to Ireland they have steadily gained in popularity due to their many unique qualities. The sheep themselves are very distinguishable with their bulky looks, tight skins, and good wool cover including the crown of their heads that leaves lambs very warm and hardy even in harsh winter conditions.

Vendéen crosses have remarkably low mortality rates at birth; they have great up and go and are easy to flesh. They are suitable for both intensive indoor and extensive outdoor lambing. The Vendéen cross has a medium bone and compact heavy muscle carcass that results in a high kill out percentage due to minimal waste. They tend to grade as E, U or R with fat class 3 when appropriately finished. They make excellent lambs for the export market with a high lean to fat ratio. Pure Vendéen rams have earned the reputation as hard workers and are proven to be exceptionally fertile. They are non-seasonal breeders and so are excellent workers all year round and make ideal terminal Sire's for early lamb production as well as for mid-season lambing. Why not try a Vendéen Ram in your flock and see the benefits for yourself. Once you've tried a Vendéen you will be back for more!! Good luck with your use of Vendéens in 2015/2016.

Irish Vendéen Sheep Society

Irish Vendéen Sheep Society special sale rules

1. All Pedigree Sheep to be sold in Euro.
2. A commission will be charged to the buyer of 5% of the purchase price + VAT at 4.3% on the commission only.
3. The Auctioneers will pass from any pedigree animal not receiving bids to the value of €300 for males and €200 for females. Bids will be sought in increments at the Auctioneers discretion.
4. Any animals in the Sale Premises which are sold by private treaty after the Auction are subject to the full commission on the price realised and such transactions must be passed through the Mart.
5. All Sheep offered for sale at 1 year old or older are to be bare clipped after the 1st April preceding the sale. No sheep to be dressed apart from tidying heads and legs. Tails may be squared off.
6. All sheep to be sold in the appropriate class and in the owner's flock group. All sheep born on or after 1st December 2014 are classified as lambs. Those born between 1st December 2013 and 30th November 2014 are classified as shearlings.
7. The order of sale in each group is by ballot (arranged by the Sales Committee). Each lot will be sold before the next one is commenced. If unsold, lots 1 to 5 in the sale may be re-run after lot 30. No other re-runs are permitted. The Champion and Reserve Champion to be sold after lot 11.
8. All sheep to be sold singly and will be identified by lot number.
9. All sheep inspected for correctness at entry to the sale. The decision of the inspectors is final.
10. The sales committee has made every effort to ensure that the information presented is accurate and correct as supplied by the Vendor. The Irish Vendéen Sheep Society and its sales committee accept no liability for any errors therein or any consequences of such errors.

The following minimum weight limits apply: Shearling rams 90 kg; Ram lambs 65 kg; Shearling ewes 65 kg; Ewe lambs 50 Kg

Lambs that are 5* terminal traits in LambPlus: "Class 2a, Ram lamb - 5*" / "Class 4a, Ewe lamb – 5*"

Background

Sheep Ireland was established “To achieve the greatest possible improvement, from genetic and other factors, in the profitability of the national sheep flock for the benefit of the Irish farmers and sheep industry”.

How to select a ram fit for purpose?

Evaluations should **never be the only tool** you use when selecting animals for breeding. Animals must also be examined to ensure the animal is also physically correct; an animal that is not physically correct (ie. mouth, feet, etc.) cannot compensate for this fault regardless of its evaluation and should be avoided for breeding purposes.

Catalogue Explanation

★★★★★

€uro-Stars – How to interpret them

- Each star represents the ranking of each index in 20% bounds
- One star represents the bottom 20% of the breed
- Five star represents the top 20% of the breed
- The higher the stars, the higher the predicted profitability of that animal

Rank

- This figure indicates more precisely where the animals rank within the breed. eg. Top 11% (see example below)
- This is displayed with the black pointer, the further to the right these are on the scale, the better its position with the breed.

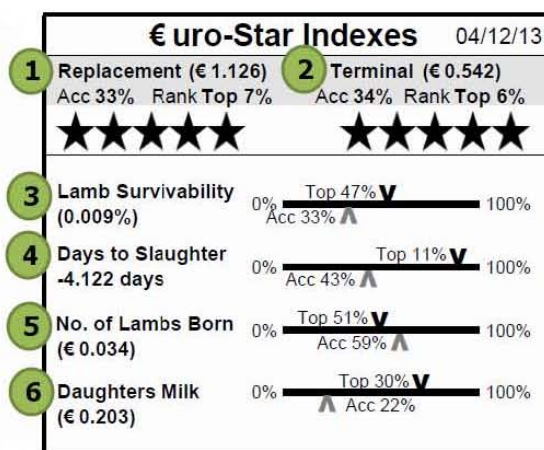

Acc % (Accuracy%)

- Acc is an abbreviation of Accuracy. This figure is very important as it represents the amount of data behind each evaluation. Where Acc is low, much less emphasis should be placed on the evaluation, and vice versa.
- This is displayed with the grey pointer, the further to the right these are on the scale, the more information this evaluation is based on. e.g. Acc 43% (see example above)

Acc % parameters

V.Poor, 0% - 14% **Poor**, 15% - 24%
Fair, 25% - 34% **Good**, 35% - 49%
V.Good, 50% and above

- 1) **Replacement (€1.126)** – If a farmer desires a ram to breed both lambs both for slaughter and replacement ewe lambs then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter, No. of lambs born & Daughters milk. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 2) **Terminal (€0.542)** – If a farmer desires a ram to breed only lambs both for slaughter then they should select a ram based on this index. The bulk of this index is a combination of Lamb Survivability, Days to Slaughter. The € value beside the index represents the difference in profit that each lamb sired from this ram will have.
- 3) **Days to slaughter** – This ranks animals on their genetic ability to grow. The index associated with this trait represents the difference in the predicted number of days required for the progeny of this ram to reach the desired slaughtered weight compared with other animals of the same breed.
- 4) **Lamb Survivability** – This ranks animals based on lambing ease and lamb survival rate. Every positive % point on this index is an extra lamb surviving to 40 days and vice versa.
- 5) **No. of Lambs Born** – This ranks animals based on the predicted prolificacy of the females from this animal compared with other animals of the same breed
- 6) **Daughters Milk** – This ranks animals based on the predicted milking performance of its daughters compared with other animals of the same breed

Ram Search

The Sheep Ireland Online Ram search is also available at sheep.ie; you can use this tool to get the most up to date evaluations for a ram, to search for rams by county, breed and evaluation ratings.
